

SPA TEPLICE
CZECHIA

SPA TREATMENT FOR CHILDREN

specialize in diseases of the musculoskeletal system and nerve diseases

Most of our patients suffer from cerebral stroke, paralysis or delayed development due to premature birth, genetic disease or injury. We also treat rheumatism patients, i.e. inflammatory diseases of muscles, joints and spine as well as children recovering after surgeries of hip, deformed limbs, spine and tendons.

Spa treatment includes 24 procedures per week and will be chosen by the doctor from the following list of procedures:

- **Thermalwater treatment procedures**
- **Individual Exercises and Positioning**

Vojta´s method of reflex locomotion, Bobath´s concept, synergic reflex therapy, myofacial ball technique, craniosacral therapy, Tymo and Tyramotion robotic upper limb therapy

- **Individual Ergotherapy and Sensorimotor Integration**
- **Massages and Thermotherapy**
- **Electrotherapy and Magnetotherapy**
- **Inhalation, Oxygen Therapy and Salt Cave**

What do you need to apply ..

Before confirming a reservation we ask our clients to send us their medical report, in english, to asses the suitability of the treatment. Medical reports, being orthopedic or neurological, should not be more than 3 months old in order for us to evaluate your current health condition. After which our physician will recommed a suitable lenght of stay, which in most cases is 4-6 weeks.

We can also help arranging an accommodation in close-by apartments if needed.
